
Global Heritage Wins Prestigious Good Design Award for Breezonic Performance Plus RV Air Conditioner

Melbourne, Australia — 14/10/2025 — *Global Heritage* is proud to announce that its **Breezonic Performance Plus RV Air Conditioner** has been recognised in the **2025 Australian Good Design Awards**, receiving the coveted **Good Design Award Winner** accolade in the **Product Design** category.

Marking a historic achievement, the **Breezonic Performance Plus** is the **first-ever RV air conditioner to win this prestigious international design award** — a testament to Global Heritage's commitment to innovation, performance, and design excellence.

The **Australian Good Design Awards** — one of the world's longest-running international design programs — celebrate excellence in design and innovation across multiple disciplines. This year's theme, *"Design for Better,"* highlights how thoughtful design can drive positive change for people, planet, and prosperity.

The Breezonic Performance Plus impressed the international jury for its modern aesthetics, technical innovation, and commitment to sustainability.

"The Breezonic Performance Plus RV Air Conditioner is a rooftop air conditioning system with reverse cycle functionality, for RVs and motorhomes. The Breezonic demonstrates contemporary styling and compact proportions. It's a clean, modern, and well thought-through product that ups the game in its field. A well-resolved design moving to more eco-friendly power and refrigerant options, nicely integrated, easy to access filter, and good display unit. Smart, innovative, and impactful design that ticks every box for good design. Well done."

— **Good Design Awards Jury**

Designed and engineered by **Global Heritage** in Australia, the Breezonic Performance Plus sets a new benchmark for comfort and efficiency in the RV and motorhome market. Its advanced performance, energy-efficient technology, and user-focused design reflect the company's mission to deliver smarter, more sustainable comfort solutions for travellers.

"We're honoured to receive this recognition from the Australian Good Design Awards," said **Nicolas Chevalier, Head of Product Development, Global Heritage**. *"Being the first Australian-designed RV air conditioner to achieve this accolade makes it even more meaningful. The Breezonic Performance Plus embodies our dedication to innovation, sustainability, and pushing the boundaries of what's possible in mobile comfort."*

About the Australian Good Design Awards

Established in 1958, the Australian Good Design Awards celebrate the best in design and innovation across 13 disciplines and over 35 categories, spanning product design, engineering, digital, architecture, and social impact. Each entry is rigorously evaluated by more than 80 international jurors against three key criteria: **Good Design**, **Design Innovation**, and **Design Impact**.

With its rich heritage, the Awards continue to champion the power of design to shape a brighter, fairer, and more sustainable future.
